

MAGNETIC LOCATOR

Description :

Great for Engineering agencies & Maintenance departments, Utilities, Water Work Municipalities, and Urban development authorities to

- Locate manhole covers buried under asphalt or pavements, catch basins valves, cast iron pipes, septic tank handles, oil tanks, valve boxes & valves, well casings and more
- The FP ID 2100 can effectively locate valves and curbs up to 9ft deep, survey markers up to 8ft deep, and PK nails up to 14" deep
- The FP ID 2100 provides performance so controlled it can distinguish between a manhole cover and a close iron valve

The FP ID 2100 Magnetic Locator & Identifier features a patented (TID)TM Target Identification System designed to save you time from digging unnecessary holes, especially in hard, Paved or frozen ground

Features :

- Unbeatable performance & sensitivity – pinpoints buried targets even near an iron fence
- Pinpoints to 1 inch of center for Valves and Curb boxes
- Excellent for finding buried ferrous objects including manhole covers, PK nails, iron pipes, valve covers, masonry nails and old hidden culverts
- Made of strong ABS.
- Pulsating tone/Low battery indication and quick, easy battery replacement

Specifications:

Operating Temperature	-25 to 60°C
Power Supply	1 x 9V Battery, 55 hours intermittent use, low battery indication
Weight	0.9 kg
Dimensions	Overall length 863mm(34 inches)
Submersible in water up to the handle grip (30")	
Circuit Board is surface mount technology & has a silicon protected coating
