

V1-D1 DIGITAL MOISTURE METER

For Moisture Testing Of Concrete & Wood.

Description :

A reliable instrument for moisture testing in materials such as concrete, timber, stone, plastic, fiber glass etc. An indispensable tool for construction industry professionals to test before continuing the construction process. The V1-D1 is pinless and does not damage the substrate under test.

Features :

- Digital gauge
- Pinless
- Used to indicate moisture content in concrete, fiber glass or wood down to a depth of 3 cms
- Digital display with moisture/dry comparison scale

Specifications :

Measurement Method	Capacitance, high frequency sensor field at the bottom.
Size (in mm)	150 x 80 x 30
Weight (g)	187
Power Supply	9V Battery (prefitted)

Applications :

- Check moisture level in concrete before painting or application of any synthetic material
- Check moisture level in wood
