

# ROW AC Voltage Detector | 12D

Economy

12D is a non-contact AC voltage detector. It is lightweight and convenient to carry due to its pocket size. The device can detect electricity when it is close in range of live sockets, adapters, connection terminals, or wires/cables.

The voltage detector can be used in residential, commercial, and industrial settings. The 12D provides 2 settings : low & high voltage.

It includes both an Audio buzzer & Visual LED light which will indicate to the user presence of live voltage.

Complies To:  
EN61010-1
