## Optical Fiber Cable Blowing Machine

## Fast \& Economical Method for Installation of Ontical Filer Cables

The Cable blowing machine comprising of an Air box, Cable pusher has been designed to provide an effective and safe method of fiber optic cable installation. The system installs fiber optic cables of $\mathbf{1 0 - 2 2 ~} \mathbf{~ m m}$ overall diameter at up to $\mathbf{9 0 m} / \mathrm{min}$ into preinstalled, pre-lubricated HDPE / plastic telecom ducts, employing the viscous drag compressed air principle. The compressed air is fed into the duct via a venturi principle and the hydraulically powered cable feed system controls the fiber optic cable.

## Over 4,00,000 Kms of OFC Installed with Stanlay Cable Blowing Machines

## Features:

Air Box

## AIRBOX :

- Manufactured from aluminium.
- Can be used for a range of cable dia from 10 - 22 mm by means of interchangeable collets with double split cable sealing arrangements. 1 pair of collets included with machine, other sizes available as optional extra's.
- Duct sealing at mouth of box
- Duct gripping facility with non duct crush and distortion design.

> Suitable for Cable Dia 10-22mm

## CABLE FEEDER:

Cable Feeder

- Hydraulically powered.
- Unit lifts and splits to allow insertion of cable between drive belts.
- Drive belts are polyurethane and moulded to unit ensuring long life between replacements.
- Belt tension can be set by means of adjustable chain drive tensioners fitted to back of unit.

- manufactured from aluminium.
- Available in cable size options of :
$8-12 \mathrm{~mm} \pm 0.5 \mathrm{~mm}$
$12-16 \mathrm{~mm} \pm 0.5 \mathrm{~mm}$
$16-20 \mathrm{~mm} \pm 0.5 \mathrm{~mm}$
