

# EZ Scope

## Description

Designed specifically for the Engineering, NDT, and automotive industries the new EZ Scope is an economical yet high performance Borescope unit. Unit is Compact in size and provides extremely bright illumination. This affordable magnification tool will make inspection easier with greater visibility in hard to reach areas. EZ scope is based on a tough yet flexible cable that can change its shape and can also be bent to align according to the shape of the confined space being inspected.

However, if you require photo/video capture, Please refer the ST10 MIGS Type Borescope.
