

# Clamp Earth Ground Tester | CET500

Mid Range

The **STANONE CET500 Clamp Earth Ground Tester** based on the **rogowski coil principle** provides a **quick & safe method** for measuring earth ground resistance without disconnecting circuit earthing/ground lines or without stakes & wires. Simply clamp the meter around the earthing strip wire and measure.

The double insulation design ensures instrument durability for outdoor work and effectiveness in blocking interference signals from the environment.

The CET500 stake-less earth ground tester provides additional feature of measuring leakage current from **0mA upto 30A**.
