Delhi Metro Rail Corporation requires video inspection camera for inspection of Rolling Stocks- Traction Motors before and after routine cleaning.

**Solution:**  
X750 high performance industrial video inspection camera with 360° articulated probe allowing inspection in the most challenging environments.

**Customer Name- Delhi Metro Rail Corporation**

**Application requirement:**  
**Delhi Metro Rail Corporation requires video inspection camera for inspection of Rolling Stocks- Traction Motors before and after routine cleaning.**

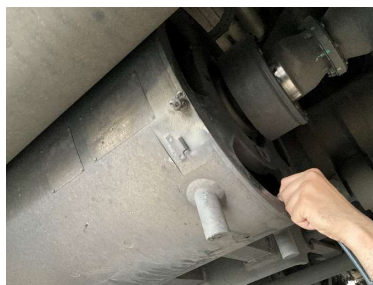

**Solution:**

Delhi Metro Rail Corporation uses X750 high performance industrial video inspection camera for inspection of Rolling Stocks- Traction Motors before and after routine cleaning.

The X750 control console includes a powerful Backside Camera with 2560x1440 pixels giving you the ability to take photos from distances of objects being inspected and for record keeping for situation analysis & reporting.

X750 Articulated Insertion Probes are **tungsten braided, resistant to heat up to 100°C and are corrosion resistant.** Tungsten braided probes are also scratch & abrasion resistant and waterproof up to 1-meter depth for 30 minutes with an IP67 environmental rating.

The **X750 Video Borescope** can link with mobile devices via the Videoscope Now Mobile App. The app lets you control the X750 remotely and download photos and videos directly onto your mobile device.
